The team at Cesit Ingegneria S.P.A. has been in the Energy sector for over 40 years. They have built plants for the Production, Transmission and Distribution of electricity at the sites of top energy producers, utilities and industrial complexes. Through the years, Cesit Ingegneria S.P.A. has expanded its area of competence in the sectors of Energy Automation; Telecommunications; and Special, Mechanical and HVAC Plants. We have acquired an integrated and synergic view of plants that is very beneficial in every phase of our work.

Decades of experience in design, manufacturing, testing, commissioning, running and maintenance of plants make us a reliable partner, and a valid service provider wherever a technical approach is required to assure that the client's needs are met. Quick installation, immediate service, accurate maintenance programs and fast emergency calls set our work apart from our competitors. We are available for our clients 24 hours a day, 7 days a week.
